

SHODHAN KUMAR SHETTY

📍 Mangalore, Karnataka 📞 +91 7204211400 ✉ shodhankumarshetty963@gmail.com

SUMMARY

Aspiring Computer Science Engineer with a strong commitment to continuous learning, adaptability, and delivering quality results. Passionate about software development, problem-solving, and building practical technology solutions. Experienced in Android, full-stack, and AI-powered application development through academic projects and internship experience, with the ability to contribute effectively in collaborative environments.

EDUCATION

Bachelor of Engineering in Computer Science Alva's Institute of Engineering and Technology, Karnataka CGPA: 7.68	May/2026
PCMC, Pre-University Studies Alva's Pre University College, Mangalore, Karnataka Percentage: 79.89%	Jun/2022
CBSE – Central Board of Secondary Education M.K Shetty Central School, Moodbidri, Karnataka Percentage: 72.64%	Aug/2020

TECHNICAL SKILLS

- **Languages:** Java, C (Intermediate), Kotlin (Intermediate), Python (Basic)
- **Mobile Development:** Jetpack Compose, Android SDK, Material 3, Coroutines Flow
- **Frontend Development:** React, HTML, CSS, JavaScript
- **Backend Development:** Node.js, Express.js, REST APIs
- **Databases Cloud:** PostgreSQL, MySQL, Firebase, Prisma ORM, Cloudinary API
- **Tools:** Git, GitHub, VS Code, Android Studio, Eclipse, Postman, Vercel
- **AI Development Tools:** Cursor, Devin, Claude, Codex, Trae, Replit
- **Documentation Design:** Overleaf (LaTeX), Solid Edge CAD

PROJECTS

Namma-HomeStay Android App	May 2026
► AI Integration: Leveraged Gemini 1.5 Flash to automate professional homestay description generation using prompt engineering. ► Cloud Backend: Implemented Firebase Firestore and Cloudinary for real-time data synchronization and optimized media management. ► Reactive UI: Developed a declarative frontend using Jetpack Compose and Kotlin Flow for high-performance, seamless state handling.	
SYNEXIS, SaaS Retail Operating System	May 2026
► Built a full-stack SaaS retail platform for inventory management, sales tracking, customer records, supplier operations, and business analytics across multiple store locations. ► Developed secure backend services using Node.js, Express.js, Prisma ORM, and PostgreSQL with JWT-based authentication, role-based authorization, and modular architecture. ► Created a responsive React + TypeScript frontend featuring dashboards, protected routes, notifications, activity tracking, and scalable business management workflows.	
IoT Based Smart Irrigation System	Aug 2025
► Built a real-time smart irrigation system using ESP32, DHT11, soil moisture sensor, and relay module to automate water flow based on moisture thresholds. ► Developed a responsive web dashboard to monitor sensor data and irrigation status. ► Integrated sensor data processing with microcontroller logic to ensure efficient and optimized water usage.	

EXPERIENCE

- Android Developer Intern (GenAI) — MindMatrix Inc.

Feb 2026 – May 2026
- Completed structured training through Salesforce Trailhead and Google Skills Boost, earning Agentblazer Champion and Agentforce Innovator credentials while gaining exposure to AI-driven workflows and cloud technologies.
 - Developed the AI-powered "Namma HomeStay" Android application using Kotlin, Jetpack Compose, and Material 3 design principles.
 - Implemented MVVM architecture, Repository Pattern, Kotlin Coroutines, and Flow for scalable state management and asynchronous operations.
 - Integrated Firebase Firestore and callbackFlow for real-time synchronization of homestay profiles, menus, availability, and traveler interactions.
 - Utilized Cloudinary SDK for cloud-based media management and integrated Google Gemini AI (gemini-1.5-flash) for automated homestay description generation through prompt engineering.
 - Designed and implemented role-based Host and Traveler workflows, including daily menu management, hidden-gems discovery, inquiry management, testing, and debugging.

CERTIFICATIONS AND ACHIEVEMENTS

- Earned the "The Complete SQL Bootcamp: Go from Zero to Hero" certification. (Udemy).

June 2026
- Salesforce Developer – Agentblazer Champion & Innovator (2025, 2026), SmartBridge.

Apr 2026
- Salesforce Superbadges: Apex Specialist, Agentforce Service, Prompt Builder Templates, Object Relationships.

Feb 2026
- Published "IoT-Driven Smart Irrigation for Precision Agriculture: Challenges and Prototype Demonstration" at Global AI Summit 2025 (Technically Co-sponsored by IEEE UP Section).

Mar 2026
- Completed certification on Supervised Machine Learning Coursera.

Oct 2024
- Programming in Core Java - Infosys Springboard.

Jul 2024

ACTIVITIES AND HOBBIES

- Founding Member, College Paraspara Sports Team – Contributed to establishing the club and participated in college-level events.
- Contributed to community service activities through Alva's Paraspara Team, including donation drives and organizing recreational and cultural programs for children at Chethana Special School.
- Conducted computer fundamentals workshops under NSS.
- Arm-wrestling, calisthenics, and strength training with a focus on physical fitness and discipline.
- Outdoor sports: Football, Kho-Kho, and Kabaddi.
- Engaged in agriculture, gardening, and plantation activities as a personal interest.
- Enjoy exploring rural landscapes, nature trails, and outdoor environments.
